

Now I feel confident about my design because I know what my design, colour and t-shirt might look like. I also know that I need to add more colour for more affect

I changed my colours from Red Yellow Green Blue to Red Yellow Blue Purple because I found out that purple was really outstanding.

Red: I felt unsure of what it will my t-shirt look like tommorow but also excited to see it.

Green: I discovered that you can do the spiral another way by going outwards than doing the original way

Black: It was a challenge with the bottles when they leak because then you don't get them dye going in the right direction.

Yellow: It was good that Mrs Hutton made all the colours a bit stronger so it looks better on the t-shirt.
