

Blue: I changed one colour to purple because I found it was quite outstanding how the purple turned out like.

White: It is a fact that doing the spiral design is way more harder than doing the other designs.

I thought my t-shirt would turn out badly because I thought maybe it would have a terrible colour with the red mixed together. As I opened it I got a huge surprise as I saw the colours exactly as a rainbow that blended together. The only part I might want to improve is the middle because it looks way too much red on it.
